Date: Wednesday, February 09, 2022 9:29:55 AM

Hello Zolymar,

We will ask Geosyntec to inspect the southern fence near the EC Waste office. It was inspected yesterday afternoon (Tuesday 2/8/2022) before the field personnel left the Site and the fence was intact at that time.

Best Regards,

Dan Gainer, PG CSM

**** WARNING EXTERNAL SENDER ****

Dan,

Good Morning!

I called Mr. Serna at 10:16 am AT, and he informed that he and his crew removed the cattle from the site yesterday afternoon and that all gates were closed. However, he suspects that there is a broken

fence near the EC Waste office. Please, have the crew reinspect that fence line to verify its integrity. During the call, Mr. Serna indicated that he would be returning to the Site to remove the cattle.

Subject: Proteco: Wednesday Morning February 9, 2022-Cattle on Site cause Short Work Stoppage

Hello Zolymar,

As we discussed on the phone, at 8:45 AM EDT (9:45 AM your time) this morning (2/9/2022) I received a call from Jaime Feliciano stating that the cattle were still present at the Site and that work had to stop for about 15 minutes for the cattle to move away from the equipment and field personnel who were working near the old cattle pen area. Jaime also informed me that Mr. Serna stopped by the Site this morning to ask if the cattle were still on the Site and was informed that they were there. Jaime also informed me that Mr. Serna did not leave his vehicle this morning and left very shortly after learning his cattle were still on the Site. Please note that all the fences were inspected late yesterday afternoon and are intact.

Please contact Mr. Serna and instruct him to remove his cattle from the Site. Please let us know when Mr. Serna will return to the Site and we will inform the field personnel.

Best Regards,

Dan Gainer, PG CSM
